ABSTRACT

The invention provides prophylactic/therapeutic agent for cancer, etc.

More specifically, a compound or its salt inhibiting the activity f a protein having
an amino acid sequence, which is the same or substantially the same amino acid
sequence represented by SEQ ID NO: 1 or SEQ ID NO: 16, a compound or its salt
inhibiting the expression of a gene for the above protein, an antisense nucleotide
containing a base sequence or a part thereof, which is complementary or
substantially complementary to the base sequence of a DNA encoding the above
protein or its partial peptide, an antibody to the above protein or its partial peptide,
etc. are usable as a prophylactic/therapeutic agent for cancer, and so on.
